Work Experience

Platform Engineer - Planit Testing, Melbourne

2025-Current

- Expanded and formalised software development practices across multiple key Product team projects, ensuring scalability, consistency, and maintainability.
- Researched, evaluated, and integrated modern development and CI/CD tools to optimise software delivery pipelines and developer productivity.
- Architected, deployed, and maintained Azure-based cloud infrastructure supporting both development and production environments.
- Implemented comprehensive monitoring, alerting, and observability frameworks to ensure system reliability and rapid incident response.
- Delivered DevOps training and mentorship to junior engineers, promoting best practices in infrastructure as code, automation, and cloud-native development.

Consultant Level 2 - Planit Testing, Syndey

2024-2025

- Provided SDET services to global clients, leading solution design and stakeholder communication in high-pressure, fast-paced environments.
- Transitioned into a more product-focused role, leading greenfield software development and overseeing automation practices and infrastructure.
- Spearheaded the successful migration from GitLab to GitHub, establishing and maintaining Planit’s GitHub Enterprise Organisation.
- Engineered and maintained AWS-based infrastructure to support development, testing, and deployment for the Product team.

Engineering Level 1 - Planit Testing, Sydney

2022-2024

- Participated in the recruitment and hiring of a new intact of Automation Engineers as well as planned and ran a 2 week bootcamp designed to train and assess new hires.

Engineering Level 2 - Planit Testing, Sydney

2021-2022

- Spearheaded the test automation solution for a valuable client which lead to further expansion of the team. Provided training and up-skilling.
